

Power-BI

Project 2: Inventory Tracker Dashboard

Project 2: Inventory Tracker Dashboard

Goal:

Track stock levels, identify low inventory, and view total sold items per category.

Fields (Columns):

- ✓ Item Name
- ✓ Category
- ✓ Stock
- ✓ Sold
- ✓ Reorder Level

STEP 1: Open Excel

- Open **Microsoft Excel**
- Create a **new blank workbook**

STEP 2: Enter Inventory Data in Excel

In Excel, enter the following table starting from **cell A1**:

Item Name	Category	Stock	Sold	Reorder Level
-----------	----------	-------	------	---------------

Laptop	Electronics	15	25	10
Mouse	Electronics	8	60	15
Chair	Furniture	20	10	5
Table	Furniture	5	12	5
Pen	Stationery	50	100	30
Notebook	Stationery	25	80	20

STEP 3: Save the Excel File

Follow these steps:

1. Click on **File** in the top-left corner of Excel.
2. Click **Save As** (or **Browse**).
3. Choose a folder (e.g., Desktop or Documents).
4. In the **File name** box, type:
`InventoryData.xlsx`
5. Make sure the **Save as type** is set to:
`Excel Workbook (*.xlsx)`
6. Click **Save**

Your inventory data is now saved as `InventoryData.xlsx`.

STEP 4: Load Inventory Data into Power BI

Follow these steps:

1. **Open Power BI Desktop**
2. On the **Home** tab, click **Get Data**
→ Then choose **Excel**
3. A file browser will open.
 - ❖ Navigate to where you saved `InventoryData.xlsx`
 - ❖ Select it and click **Open**
4. In the **Navigator** window:
 - ❖ You'll see a preview of your table.
 - ❖ Make sure the checkbox next to the table/sheet is ticked.
 - ❖ Click **Load**

Power BI will load the inventory data into the Fields panel.

STEP 5: Create a Bar Chart for Items Sold

Follow these steps:

1. In Power BI, go to the **Report view**
(White canvas with chart icons on the right)
2. In the **Visualizations** panel, click on the **Clustered Bar Chart**
(It shows horizontal bars)
3. A blank chart will appear on the canvas.
4. In the **Fields** panel:
 - ❖ Drag `Item Name` into the **Y-Axis** (or Axis)
 - ❖ Drag `Sold` into the **X-Axis** (or Values)
5. Rename the chart title:
 - ❖ Click the chart title → then go to **Format (paint roller)** → expand **Title**
 - ❖ Change the title text to: "**Items Sold**"

You now have a visual showing which items are selling the most.

STEP 6: Create a Column Chart for Stock Levels

Follow these steps:

1. Click on a **blank area** of the canvas.
2. In the **Visualizations** panel, click on the **Clustered Column Chart**
(Icon with vertical bars)
3. A new blank chart will appear.
4. In the **Fields** panel:
 - ❖ Drag `Item Name` into the **X-Axis**
 - ❖ Drag `Stock` into the **Y-Axis (Values)**
5. Rename the chart:
 - ❖ Click on the chart title
 - ❖ Go to **Format > Title** (paint roller)
 - ❖ Change the title to: "**Current Stock Levels**"

This chart helps you see which items are running low and which are well-stocked.

STEP 7: Highlight Low Stock Items Using Conditional Formatting

A. Create a Table Visual

1. Click on a **blank area** of the canvas.
2. In the **Visualizations** panel, click the **Table** icon
(Looks like a simple grid)
3. In the **Fields** panel, drag the following into the **Values** section:

- ❖ Item Name
- ❖ Stock
- ❖ Reorder Level

You'll now see a table with stock and reorder info.

B. Apply Conditional Formatting

1. Click on the **Table visual** to select it.
2. Go to the **Format** panel (paint roller icon)
3. Expand the **Cell Elements** section
4. Find **Stock** field → Turn ON **Background color**
5. Click the tiny fx (function button) next to **Color** setting
6. In the popup:
 - Format style: **Rules**
 - Based on: **Stock**
 - Rules:
 - If value **is less than** **Reorder Level** → color = **red**
 - If value **is greater than or equal to** **Reorder Level** → color = **green**
7. Click **OK**

Now the table will automatically highlight low-stock items in red — very useful for inventory management!

STEP 8: Add Summary Cards and Slicers

A. Create Summary Cards

1. Total Stock Across All Items

1. Click a blank area on the canvas.
2. In the **Visualizations** panel, click the **Card** icon 
3. Drag `Stock` into the **Values** section
4. It will show the **sum of stock**
5. Rename the card title to: "**Total Stock**"

2. Total Units Sold

1. Click on another blank area
2. Insert another **Card**
3. Drag `Sold` into the **Values** section
4. Rename the title to: "**Total Sold**"

Now you have total numbers shown at the top of your dashboard.

B. Add a Slicer to Filter by Category

1. Click on a blank space
2. In the **Visualizations** panel, click the **Slicer** icon (filter/list icon)
3. Drag `Category` into the slicer

You can now filter all visuals by selecting a category (e.g., Furniture, Electronics)

STEP 9: Format and Polish the Dashboard

A. Rename All Visual Titles

1. Click each visual one by one.

2. Go to **Format (paint roller) > Title**.
3. Edit the **Title Text** to be clear and descriptive:

- ❖ “Items Sold”
- ❖ “Current Stock Levels”
- ❖ “Total Stock”
- ❖ “Total Sold”
- ❖ “Low Stock Alert Table”
- ❖ “Filter by Category”

B. Enable Data Labels on Charts

1. Click your **bar and column charts**
2. In the **Format** panel > expand **Data Labels**
3. Turn them **ON**

This shows numbers on top of each bar for better readability.

C. Apply a Visual Theme (Optional)

1. Click the **View** tab at the top
2. Choose a theme like:

- ❖ “Colorblind Safe”
- ❖ “Minimal”
- ❖ “Custom”

D. Arrange and Align Your Dashboard

Use drag and resize tools to:

- ❖ Place **summary cards at the top**
- ❖ Show **charts in the middle**
- ❖ Put **table and slicer** at the bottom or side

1. Make sure visuals **don’t overlap** and look clean.

Optional: Use Gridlines or Snap to grid (View tab) to align visuals evenly.

STEP 10: Save and Export Your Inventory Dashboard

A. Save Your Power BI Project File

1. Click **File** (top-left corner)
2. Select **Save As**
3. Choose a folder (e.g., Desktop or Documents)
4. Enter a name:
`InventoryTrackerDashboard.pbix`
5. Click **Save**

This saves your work so you can reopen and edit it later in Power BI.

B. Export as a PDF (Optional)

1. Click **File > Export > Export to PDF**
2. Power BI will generate a PDF version of your current report page

Save it and share with others

C. (Optional) Publish Online

If you want to share it on the web:

1. Click **Home > Publish**
2. Sign in with your Microsoft account
3. Choose a workspace (like “My Workspace”)
4. Your dashboard will be uploaded to the **Power BI Service**
5. You can share it using a link or schedule automatic refreshes
