

Power-BI

Project 3: Sales Tracker Dashboard

Project 3: Sales Tracker Dashboard

STEP 1: Open Excel

- ❖ Open **Microsoft Excel**
- ❖ Create a **new blank workbook**

STEP 2: Enter the Sales Data

Type this table into Excel starting from cell A1:

Date	Product	Quantity Sold	Unit Price
01/07/2024	Laptop	5	50000
01/07/2024	Mouse	10	500
02/07/2024	Laptop	2	50000
02/07/2024	Chair	4	3000
03/07/2024	Mouse	6	500
03/07/2024	Table	3	4500
04/07/2024	Laptop	1	50000

Check that column names are:

Date, Product, Quantity Sold, Unit Price

STEP 3: Save the Excel File

1. Click **File > Save As**
2. Save the file as: **SalesData.xlsx**
3. Choose a folder like Desktop or Documents
4. Click **Save**

STEP 4: Load Data into Power BI

1. Open **Power BI Desktop**
2. Click **Home > Get Data > Excel**
3. Select your SalesData.xlsx file and click **Open**
4. In the Navigator:
 - ❖ Check the sheet/table
 - ❖ Click **Load**

STEP 5: Create a Sales Amount Column

We need to calculate **Total Sales = Quantity × Unit Price**

1. Go to the **Data View** (table icon on the left)
2. Click **New Column** (from the top ribbon)
3. Type this DAX formula:

Sales Amount = 'SalesData'[Quantity Sold] * 'SalesData'[Unit Price]

4. Press **Enter**

This creates a new column called Sales Amount

STEP 6: Create a Line Chart for Daily Sales

1. Go to **Report View**
2. Click **Line Chart** from Visualizations
3. Drag Date to the **X-axis**
4. Drag Sales Amount to **Values**
5. Set **Aggregation** to **Sum**
6. Title: "**Daily Sales Trend**"

You'll now see sales over time.

STEP 7: Create a Bar Chart for Product-wise Sales

1. Click on a blank area of canvas
2. Click **Clustered Column Chart**
3. Drag Product to **Axis**
4. Drag Sales Amount to **Values**
5. Set aggregation to **Sum**
6. Title: "**Sales by Product**"

This shows top-selling products.

STEP 8: Add KPI Cards

A. *Total Sales*

1. Click on blank space
2. Insert **Card**
3. Drag Sales Amount to Values
4. Aggregation: **Sum**
5. Title: "**Total Revenue**"

B. *Total Quantity Sold*

1. Add another Card
2. Drag Quantity Sold to Values
3. Aggregation: **Sum**
4. Title: "**Total Units Sold**"

STEP 9: Add a Slicer for Product

1. Click on a blank area
2. Insert **Slicer**
3. Drag Product into it

This lets you filter all visuals by selected product.

STEP 10: Format and Save

1. Rename all titles
2. Enable **Data Labels** for charts
3. Apply a theme from **View > Themes**
4. Arrange visuals neatly
5. Save as: SalesTrackerDashboard.pbix
6. (Optional) Export PDF: **File > Export > Export to PDF**
