

Project: Simple Profit & Loss (P&L) Dashboard

Objective: Track revenue, expenses, and profit trends over time and visualize category-wise breakdowns of income and expenditure.

Sample Dataset (profit_loss.csv or Excel)

You can create a CSV/Excel file like this:

Date	Category	Type	Amount
2024-01-01	Product Sales	Income	10000
2024-01-02	Rent	Expense	2000
2024-01-03	Service Sales	Income	5000
2024-01-05	Utilities	Expense	1000
...	...	...	...

- ❖ **Type** column indicates: “Income” or “Expense”
- ❖ **Amount** is the value
- ❖ **Category** helps break down sources of income/expense

DASHBOARD CREATION

Step 1: Open Power BI

- ❖ Launch Power BI Desktop
- ❖ Click “**Get Data**” → **Choose “CSV” or “Excel”**
- ❖ Select your profit_loss.csv or .xlsx file
- ❖ Click **Load**

Step 2: Transform the Data (Optional)

Click **Transform Data** to clean or check your table:

✓ *What to verify:*

- ❖ Date → should be in **Date format**
- ❖ Amount → should be in **Decimal or Whole Number**
- ❖ Type and Category → should be in **Text**

Once done, click “**Close & Apply**”

Step 3: Create Measures Using DAX

Go to **Modeling** → **New Measure** Add the following one by one:

3.1 Total Income

Total Income = CALCULATE(SUM('profit_loss'[Amount]), 'profit_loss'[Type] = "Income")

3.2 Total Expense

Total Expense = CALCULATE(SUM('profit_loss'[Amount]), 'profit_loss'[Type] = "Expense")

3.3 Net Profit

Net Profit = [Total Income] - [Total Expense]

◆ *3.4 Monthly Profit*

(Only if you want monthly trend later)

Monthly Profit =

```
CALCULATE(  
    [Net Profit],  
    ALLEXCEPT('profit_loss', 'profit_loss'[Date])  
)
```

Step 4: Create Visuals

4.1 KPI Cards

Use **Card Visuals** to display:

- ❖ Total Income
- ❖ Total Expense

- ❖ Net Profit

4.2 Pie Chart – Expense by Category

- ❖ Legend: Category
- ❖ Values: Amount
- ❖ Filter applied: Type = "Expense"

4.3 Pie Chart – Income by Category

Same as above, filter Type = "Income"

4.4 Column Chart – Monthly Profit Trend

- ❖ Axis: Date (change to Month or Month-Year)
- ❖ Value: Net Profit or Total Income/Expense side-by-side
- ❖ Format x-axis to show "Month Year"

4.5 Table – Detailed Transactions

- ❖ Use Table visual
- ❖ Add: Date, Category, Type, Amount

Step 5: Add Slicers (Filters)

Go to **Visualizations** → **Slicer**, and add:

- ❖ Date (with between filter or date hierarchy)
- ❖ Type (Income/Expense)
- ❖ Category

This helps users filter and drill down into the data.

Step 6: Format the Dashboard

- ❖ Add a title: **Text Box** → “Simple Profit & Loss Dashboard”
- ❖ Choose a theme: **View** → **Themes** → Select color scheme
- ❖ Use **View** → **Snap to Grid** for proper alignment
- ❖ Format numbers: Click card → **Format** → Currency (₹, \$, etc.)

- ❖ Use **Tooltips** to show extra info on hover (optional)

Step 7: Save the File

- ❖ Click **File** → **Save As**
- ❖ Save as Profit_Loss_Dashboard.pbix

Step 8: Export or Share

- ✓ **Export as:**
 - ❖ **PDF:** File → Export → PDF
 - ❖ **PowerPoint:** File → Export → PowerPoint
- ✓ **OR Publish:**
 - ❖ Click **Publish** (Power BI Service login required)

Final Dashboard Layout

Component	Visual Type
Total Income	Card
Total Expense	Card
Net Profit	Card
Expense by Category	Pie Chart
Income by Category	Pie Chart
Monthly Profit Trend	Line or Column Chart
Detailed Transaction List	Table
Filters	Slicers (Date, Type, Category)

Learn

- ❖ Importing CSV or Excel data
- ❖ Creating DAX measures (Income, Expense, Profit)
- ❖ Building KPI cards and financial charts

- ❖ Applying filters and slicers
- ❖ Formatting for finance-style reporting
- ❖ Saving, exporting, and publishing dashboards
